

DK AVIARY MIX

Complementary feed for birds such as: storks, herons, hammerheads and night herons

A varied mix of meat, fish, bone and whole insects ensures a varied meal. Due to the coarse grind, animals can easily grab the pieces with their beak. The added vitamins and minerals make the product complete.

Features and Benefits of DK Aviary Mix

- * Variation in the mix approaches the natural diet
- * Designed especially for carnivorous wading birds
- * Structure enables birds to easily ingest the product
- * Added vitamins and minerals completes the product
- * Contains 30% whole black soldier fly larvae, an excellent source of protein which makes the product more sustainable
